

BF6

6 hp 4-stroke Outboard Engine

new

High Charging Capacity

Honda's high output alternators offer up to 6A, providing enough power to charge electronic devices like mobile phones, lights, or GPS on board.

Honda 4-stroke engine

6 hp, 4-stroke, Single-Cylinder 127 cm³ OHV engine, that provides efficient acceleration and high levels of torque. with low emissions.

More torque

127cc engine displacement for more low-mid range power and torque.

Economical

Low-maintenance and superb fuel economy to keep running costs to a minimum.

Low Vibration

Innovative rubber mounts developed by Honda ensure a smooth ride whatever the engine speed.

Low noise design

The BF range is amongst the quietest portable engines on the market.

Easy to Start

Honda's decompression mechanism reduces the pulling force required to start the engine.

Easy Storage

A foldable tiller handle increases compactness to help with storage.

Portability

The BF4 is amongst the lightest engine in it's class, and has an ergonomically designed handle to make carrying even easier.

Optional shaft lengths

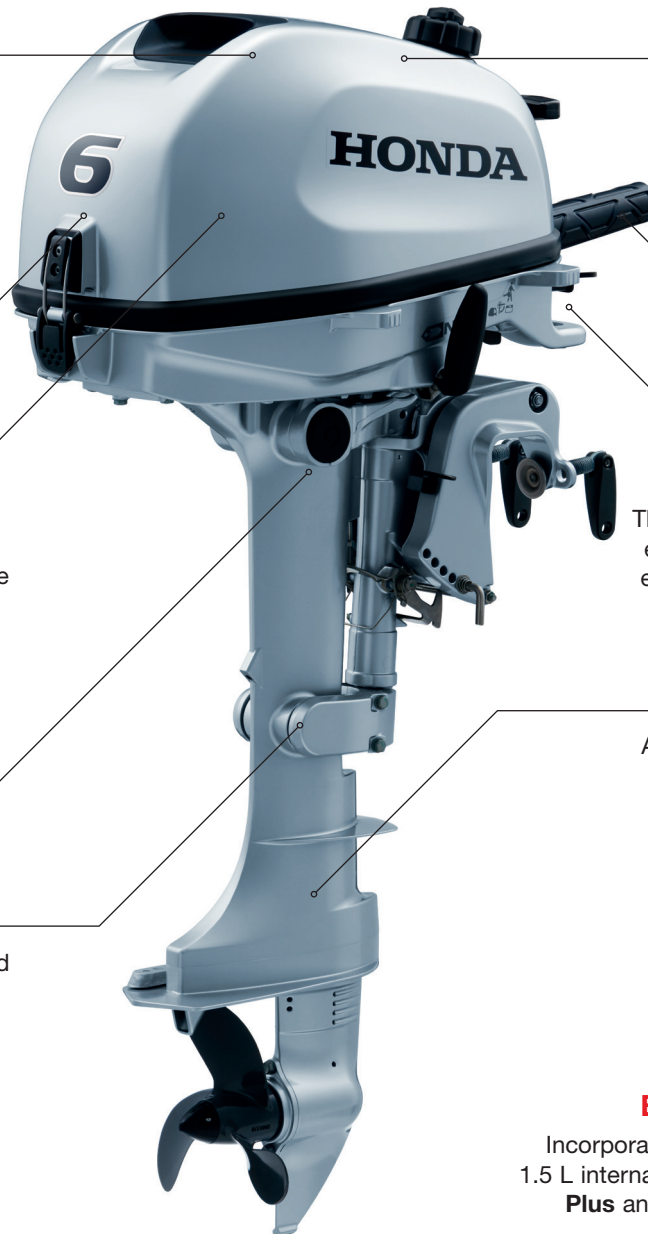

Available in either long or short shaft, dependent on model.

Engine Protection

An oil alert system will warn you of a drop in oil pressure and automatically limit the engine speed to 2,300 rpm.

Extended Running Time

Incorporating a specially designed large 1.5 L internal fuel tank for longer journeys. **Plus** an optional an external fuel tank.

Compact, portable and easy to use, our new BF6 engine is part of our market-leading portable outboard range. When developing our new portable range, our research and development team conducted hundreds of test sessions, not only to ensure the highest reliability in the worst conditions, but also to provide a complete performance package for more comfortable journeys.
